

ENERGY WISE

Heating options

Central storage furnaces and boilers use electric thermal storage (ETS) technology that converts electricity to heat during low-cost off-peak hours and stores the heat in specially designed, high-density bricks, which provide enough heat during the 16-hour on-peak portion of the day.

CENTRAL STORAGE FURNACE OR BOILER

Electric rate: 5.3¢/kWh

- Heat is distributed through forced air or hot water systems.
- A sensor monitors outdoor temperature to determine how much heat must be stored in the bricks.
- The storage furnace or boiler offers an industry leading five-year parts warranty for both parts and services.
- A central storage furnace or boiler can serve as your sole heating source, or can be used to supplement heat pump systems.
- \$100/kw rebate for qualifying Storage Space Heating systems installed in 2024.

Plus, it's safe and clean. No chimneys, no flues, no backdrafts, no carbon monoxide.

For sizing and pricing information contact a registered installer of Steffes storage heating equipment.

Visit heatforlessnow.com to find a list of registered installers in your area.

Your Touchstone Energy® Cooperative

When you think about saving money, think energy efficiency.

COST COMPARISON	
Propane	5.3¢/kWh electricity
70% Efficient standard unit	Equivalent to 99 cents/gal. propane
95% Efficient high-efficiency unit	Equivalent to \$1.35/gal. propane
Natural Gas	5.3¢/kWh electricity
70% Efficient standard unit	Equivalent to \$1.09/therm natural gas
95% Efficient high-efficiency unit	Equivalent to \$1.48/therm natural gas
Reduced rates do not reflect any variable wholesale power cost adjustment that may be required. Rates are subject to change.
