

# HOW DO CAPITAL CREDITS WORK?

1

We track how much you pay for electricity each year.

2

We pay for system maintenance and improvements.

3

At the end of the fiscal year, we see if there are excess revenues.

4

Any excess is assigned to you, based on your electric use and cost of service.

5

When our financial condition permits, ECE's Board of Directors decides to pay out capital credits.

6

Most members who have been with ECE for over a year will receive a payout in the form of a credit on your bill!
