

ENERGY WISE

Heating options

Keep every room warm and cozy with high quality room storage heaters, which charge for eight hours during off-peak periods. The units release stored heat during on-peak hours each day.

The units offer individual room control and safe, clean, comfortable heat anywhere you need it.

ROOM STORAGE HEATERS

Electric rate: 5.3¢/kWh

Room storage units are affordable and 100 percent efficient. Plus, they require no duct work and take advantage of the low off-peak electric rate of 5.3¢/kWh. Units are housed in a sleek cabinet in a neutral color, to complement any décor, and they are covered by a five-year warranty.

- Room storage heaters can be easily installed during construction or remodeling projects and easily retrofitted.
- Room storage heaters use electric thermal storage (ETS) technology to convert electricity to heat.
- A quiet fan circulates heat from the bricks into the room when the thermostat calls for heat.
- Each room storage heater is individually controlled so you can adjust the temperature in each room.

\$100/kw rebate for qualifying Storage Space Heating systems, installed in 2021.

During off-peak hours, ETS units convert electricity into heat and store that heat in specially designed high-density ceramic bricks. These bricks are capable of storing vast amounts of heat for extended periods of time. This stored heat is circulated evenly and quietly by a fan in the unit as the room thermostat calls for heat.

For sizing and pricing information contact a registered installer of Steffes storage heating equipment.
